EXPERIENCE

Product Designer – The Benevolent Bandwidth

Volunteer-led open-source AI nonprofit | January 2026 – Present | Davis, CA

- Conducted **competitive analysis** of delivery and logistics platforms to understand industry standards and common user workflows, informing early product direction
- Designing an **end-to-end** delivery optimization web application, applying **accessibility** best practices while developing a scalable design system to ensure consistency

Product Design Intern – Laminar Systems (prev. H2Ok Innovations)

AI clean-tech startup | June 2025 – September 2025 | Boston, MA

- Built a **design system** for the software team by creating components, simplifying and standardizing the creation of network architectures on Figma
- Conducted **5 user interviews** on an internal device performance tracking platform to uncover pain points and inform design changes that simplify the experience and improve clients' workflows

Product Designer – Clubly.org

Club and event discovery platform | January 2025 – Present | Davis, CA

- Independently designed the events page to connect 35,000+ students with 200+ campus clubs, resulting in **100+ event postings** and **600+ users**
- Conducted **8+ user interviews and usability tests** to understand current club promotion and discovery processes, refining feature requirements to better support attendance
- Collaborated with 11 **cross-functional** team members to align design decisions with user needs, platform goals, and technical constraints

Fellowship Program Manager – Design Interactive

Human-centered design organization | March 2025 – March 2026 | Davis, CA

- Led a 6-week UI/UX education program for **90+ members**, delivering weekly presentations on each stage of the design process to introduce members to UI/UX fundamentals
- Organized user testing sessions and community events, reinforcing learning and building an inclusive community

EDUCATION

University of California, Davis

Bachelor of Science, Cognitive Science

Expected graduation: June 2027

Dean's Honor List (2x), Best Hack for Social Good @ HackDavis

Skills: Wireframing, Interaction Design, Design Systems, User Experience Design, User Interface Design, Responsive Design, Prototyping, User Research, Usability Testing, HTML/CSS/JS, Python

Tools: Figma, Adobe Illustrator, Adobe Photoshop, Google Suite, Microsoft Office, Jira
